DWA_04.3 Knowledge Check_DWA4

_____

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

-Use arrow functions to close over local variables ,I find this rule useful because when you create an arrow function, it automatically captures the variables from its surrounding scope . This means that even if the function is executed from outside of that scope it still has access to those variables unlike regular functions which create their own scope and do not automatically capture variables from the surrounding scope.

-Always use an alt attribute on image tags , the alt attribute provides alternative text for images which is crucial for individuals who are visually impaired or rely on screen readers to access the web content

_____

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

-Bind event handlers for the render method for internal n the constructor
-do not use underscore prefix for internal methods of a react component
I find these confusing because I am struggling to grasp their meaning and the logic behind them.
